

## COMPANY PROFILE

# Secure Microsoft 365, done right

---

Microsoft 365 security and compliance specialist for mid-market companies in the DACH region. Projects, managed services and assessments from a single partner.

# A specialist, not a generalist

---

We make Microsoft 365 secure, compliant and managed, so companies can focus on their business instead of handling IT security on the side.

cubic solutions works in the depth of Microsoft 365 security and compliance, not across the board. We are a **remote-first company, distributed across Germany**, and combine project work with ongoing operations. We practise what we recommend: cubic is certified to **ISO/IEC 27001:2022**.

## Eye level

A dedicated, personal contact instead of an anonymous ticket number. We talk straight.

## Proactive

We prevent problems rather than just fixing them, and make your security posture visible.

## Holacracy

Responsibility sits where the know-how is. Decisions are made clearly and fast.

# Projects first, operations on request

## Projects and consulting

Microsoft 365 security rollouts, identity and conditional access (Entra ID), device management (Intune), endpoint and data security (Defender, Purview), compliance (NIS2, ISO 27001), Copilot and AI governance, and SOC setup.

**This is what you bring us projects for.**

## Managed services as proof of depth

What we implement, we run permanently on request. A partner who can deliver a secure workplace, a SOC or backup as a managed service has clearly mastered the project phase.

### **cubic.workplace**

Managed, secure Microsoft 365 workplace.

### **cubic.soc**

24/7 threat detection with Defender and Sentinel.

### **cubic.backup**

GDPR-compliant Microsoft 365 backup.

### **cubic.care**

Microsoft 365 support with a dedicated contact.

### **cubic.securemind**

Security awareness and phishing simulations.

### **cubic.dataprivacy**

External data protection officer as a service.

## Assessments (fixed-price entry)

M365 Security Assessment, Conditional Access Review, Intune Best Practice Review, NIS2 Assessment, AI Readiness Check, Cloud AI Act Readiness.

## Own product: clarios

Security-as-SaaS for Microsoft 365: daily tenant insights, audit preparation and management-ready reports.

# Depth in the Microsoft security stack

Our specialisation lies in the security and compliance services of Microsoft 365. We combine them into one secure, managed tenant.

## Identity and access

Microsoft Entra ID, Conditional Access, zero-trust policies.

## Threat protection

Microsoft Defender (XDR) and Sentinel for detection and response.

## Device management

Microsoft Intune: standardisation, updates, endpoint security.

## Compliance and data

Microsoft Purview, GDPR, ISO 27001, NIS2 and the EU AI Act.

## Adopt AI safely

Microsoft 365 Copilot: data access, data lifecycle management and governance, so AI only sees what it is allowed to see.

**What this solves:** security without extra effort, compliance that keeps pace, and visibility instead of blind spots.

# We practise what we recommend

## ISO 27001:2022

Certified ISMS, externally audited every year. Scope: identity and access, managed services, security consulting, operation of critical IT infrastructure.

## Microsoft Solution Partner

Designated for Security and for Modern Work.

## Team certifications

Cybersecurity Architect Expert, Azure Security Engineer, Security Operations Analyst, M365 Security Administrator.

# How we start

---

- 1 Intro call, 30 minutes.** We clarify the starting point and whether it is a fit.
- 2 Assessment.** We name the sensible next step, often a fixed-price assessment.
- 3 Delivery.** The project, and on request ongoing operation as a managed service.
